

CAIRNS

In accordance with the Restrictive Covenant registered on the title to each lot in Hawk's landing, each lot will have a uniform address cairn installed at the driveway entrance. To achieve uniformity these are constructed by the developer and provided to each builder at the time of completion of landscaping (which hopefully will coincide with the homeowners moving in).

Payment for each cairn is made by the builder at the time that it purchases the lot. The cost as at this date is \$2,500.00 per cairn which is subject to adjustment over time as actual costs change. Once a builder has paid for a cairn, however, it will be delivered when the lot is ready.

Builders must take care to install electrical service to the cairn location. Hopewell can assist in identifying the required location for the cairn. When the builder is ready for cairn installation, please contact John Brogden at 815-2795 (brogdenj@primus.ca) and he will see to a timely installation.
